## **T304 1.5"—4" Dual Purge Port Ball Valves**

Sanitary Solutions stocks a full port, cavity filled, T304 clamp connection dual purge port ball valve. Our dual purge port ball valve is constructed with a full port positioned inside the valve body between two polished flanges and two Teflon® valve seats. Take a moment to review the two purge ports located at the bottom of the valve for full drain ability, taking samples, and CIP/SIP applications.

Our dual purge port ball valve is 100% full opening, and equipped to take a maximum pressure of 200 PSI and temperature from 60°F to 300°F as well as maintaining a full flow rate with a minimum pressure drop.

In case of a tight situation or if your valve is close to a wall and will not open or close, you can remove the handle and re-position to open or close the valve. Please go to the [www.sanitarysolutions.com](http://www.sanitarysolutions.com) for more information or contact us at 1-888-909-3569 or 1-855-640-7871.

## T304 Dual Purge Port Ball Valve Product Breakdown

Item	Description	Material	Qty.
S	Bolt	T304	1
2	Rotating Shaft	T304	1
3	Spring	T304	2
4	Handle	T304	1
5	Locating Sleeve	T304	1
6	Stem Packing	Teflon®	1
7	Stem	T304	1
8	Bolt	T304	3
9	Nut	T304	1
10	Washer	Teflon®	1
11	Valve Body	T304	1
12	O-Ring Seal	Buna	1
13	Seat	Teflon®	1
14	Gasket	T304	1
15	Ball Seat	T304	1
16	Seat	Teflon®	1
17	O-Ring Seal	Buna	1
18	Valve Body	T304	1
19	Bolt	T304	3
20	Washer	Teflon®	1
21	Nut	T304	1
22	Hex Deck Bolt	T304	1
23	Hex Deck Bolt	T304	1
